

Weekly Routine Pool Care

The BAQUACIL® Pool Care System includes three principal components that work together to save you time and maintenance: **BAQUACIL Sanitizer and Algistat**, **BAQUACIL Oxidizer**, and **BAQUACIL Algicide** (or **BAQUACIL Performance Algicide** if you have an attached spa or water feature).

Here's how easy it is to use them:

WEEKLY CARE

Once a week, test your pool water with BAQUACIL Test Strips to make sure the levels of BAQUACIL Sanitizer and Algistat, pH and total alkalinity are within acceptable ranges. The BAQUACIL Sanitizer and Algistat level should be between 30 and 50 ppm. When the level is 40 ppm or less, add BAQUACIL Sanitizer and Algistat to bring the level up to 50 ppm. (See the "Top-Up Dosage Rates For BAQUACIL Sanitizer and Algistat" chart below). Never let the level fall below 30 ppm, since algae and bacteria may not be controlled adequately.

Top-up doses can vary from pool to pool. But you'll probably find you only have to add BAQUACIL Sanitizer and Algistat once every 10–14 days, leaving you with a lot more time to enjoy your pool.

Algae can ruin your pool's appearance, make pool walls slippery and unsafe and clog your filter. A maintenance dose of BAQUACIL Algicide (or a maintenance dose of 2–4 oz. of BAQUACIL Performance Algicide per 10,000 gallons if you have an attached spa or water feature), added every week, will help prevent the growth of algae.

(See the "Maintenance Dosage Rates" chart on page 9). Remember, solving algae problems is more costly and time-consuming than preventing them.

WEEKLY SUMMARY

1. Test the level of BAQUACIL Sanitizer and Algistat and top-up to 50 ppm if the level is 40 ppm or below.
2. Test total alkalinity and adjust, if it is outside the 80–150 ppm range.
3. Test pH and adjust, if it is outside the 7.2–7.8 range.
4. Add a maintenance dose of BAQUACIL Algicide. (See chart on page 9). (For pools with an attached spa or water feature, add a maintenance dose of BAQUACIL Performance Algicide [2–4 oz. per 10,000 gallons] instead of BAQUACIL Algicide).
5. Perform all necessary housekeeping. (See General Pool Care on page 10).
6. Check filter pressure. If high, backwash or rinse the filter (according to the manufacturer's recommendations).
7. Clean out skimmer basket(s) and pump basket(s) as necessary.

TOP-UP DOSAGE RATES FOR BAQUACIL Sanitizer and Algistat	Pool size (gals.)	If Sanitizer Level (ppm) is . . .							
		35	30	25	20	15	10	5	0
	5,000	3/4	1	1	1 1/4	1 1/2	1 3/4	2	2
	7,500	1	1 1/4	1 1/2	2	2 1/4	2 1/2	2 3/4	3
	10,000	1 1/4	1 3/4	2	2 1/2	3	3 1/4	3 3/4	4
	12,500	1 1/2	2	2 1/2	3	3 1/2	4	4 1/2	5
	15,000	2	2 1/2	3	3 3/4	4 1/4	5	5 1/2	6
	17,500	2 1/4	3	3 1/2	4 1/4	5	5 3/4	6 1/2	7
	20,000	2 1/2	3 1/4	4	5	5 3/4	6 1/2	7 1/4	8
	22,500	2 3/4	3 3/4	4 1/2	5 1/2	6 1/2	7 1/4	8 1/4	9
	25,000	3	4	5	6	7	8	9	10
	27,500	3 1/2	4 1/2	5 1/2	6 3/4	7 3/4	9	10	11
	30,000	3 3/4	5	6	7 1/4	8 1/2	9 3/4	11	12
	32,500	4	5 1/4	6 1/2	8	9 1/4	10 1/2	11 3/4	13
	35,000	4 1/4	5 3/4	7	8 1/2	10	11 1/4	12 3/4	14
	37,500	4 1/2	6	7 1/2	9	10 1/2	12	13 1/2	15
	40,000	5	6 1/2	8	9 3/4	11 1/4	13	14 1/2	16
	42,500	5 1/4	7	8 1/2	10 1/4	12	13 3/4	15 1/2	17
	45,000	5 1/2	7 1/4	9	11	12 3/4	14 1/2	16 1/4	18
	47,500	5 3/4	7 3/4	9 1/2	11 1/2	13 1/2	15 1/4	17 1/4	19
	50,000	6	8	10	12	14	16	18	20

All units are in pints.

Monthly Routine Pool Care

Over the course of a few weeks, many kinds of pollutants can gather in a swimming pool. Swimmer wastes such as perspiration, cosmetic products and urine can cause eye and skin irritation, while giving micro-organisms plenty of food. So, once a month, add BAQUACIL® Oxidizer. (See “Maintenance Dosage Rates” chart below). BAQUACIL Oxidizer, along with adequate filtration, will take care of these undesirable waste materials and clarify the water to keep your pool beautifully clear and sparkling.

Allow BAQUACIL Oxidizer to disperse throughout the pool for several minutes before swimming. Remember to follow the important safety instructions on the container. Rinse and dispose of the container immediately after use.

MONTHLY SUMMARY

1. Follow normal weekly care procedures.
2. Add the appropriate dose of BAQUACIL Oxidizer.

MAINTENANCE DOSAGE RATES	Pool Size (gals.)	Weekly Dosage (oz.) BAQUACIL Algicide	Monthly Dosage (gals.) BAQUACIL Oxidizer
	5,000	$\frac{3}{4}$	$\frac{1}{2}$
	7,500	1	$\frac{3}{4}$
	10,000	$1\frac{1}{4}$	1
	12,500	$1\frac{1}{2}$	$1\frac{1}{4}$
	15,000	2	$1\frac{1}{2}$
	17,500	$2\frac{1}{4}$	$1\frac{3}{4}$
	20,000	$2\frac{1}{2}$	2
	22,500	3	$2\frac{1}{4}$
