

Kielder Observatory, Northumberland, 2008

Douglas Fir, Siberian Larch and Whitewood

Photography reproduced with the kind permission of Charles Barclay Architects.

Interesting Facts:

- **Product specification generated through a CPD presentation**
- **Observatory designed after a RIBA (Royal Institute of British Architects) competition launched by the Kielder Partnership.**
- **Fire retardant treated timber is used throughout the construction:**

*Douglas Fir - exterior support
Whitewood - frame carcassing
Siberian Larch - cladding
Plywood - interior boarding*
