

'Shadow Cast' - Sun Life Assurance Administrative Centre, Bristol, 1996.

Bamboo lengths

DRICON®

FLAMECHECK

Interesting Facts:

- Used 3,000 lengths of bamboo, each measuring 6 metres.
- Considerable trial work needed; this revealed that the best method to achieve the required level of fire protection was to first impregnate with DRICON®, followed by a special application of FLAMECHECK by trough to ensure an even coating.
- The sculpture is illuminated in such a way that light and shadow strike the bamboo and spill onto the floor below.
